## *Hulton Bridge/Student Engineering Opportunity*

Thanks to a collaborative effort between PennDOT, Breyman Engineering and Riverview teachers, students have been afforded with the opportunity to learn about and observe the construction process of the new Hulton Bridge. Dr. Mike McNally (Teacher), John Myler (PA Dept of Transportation), and Jason Booher (Brayman Engineering), have been providing hands-on experiences for students as they discuss their backgrounds, go over important challenges related to the building of the new bridge, and examine potential opportunities in civil engineering and heavy contracting. Students learned about the obstacles the contractors must clear including the uncertainties of the bidding process, and they discussed the cooperation between government, private contractors, and the public that is required for this sort of project to be completed successfully. Special thanks to all parties for including Riverview students in this beyond the classroom experience.
