# Week of May 25th, 2020

### Physics 1

This week there is one assignment that is due and it is an online quiz on the material from the momentum unit (MTM Practice 1, 2, and 3). Instructions are below.

### Assignment: Quiz

### Due by 3:00 pm Friday, May 29<sup>th</sup>.

1.) Login to the class website.

2.) On the home page of the class website will be a link to complete the quiz. Click on the link to begin. The quiz contains multiple choice and extended response questions and will be similar to your last two quizzes.

Some things to note about the quiz:

1.) The quiz will be available to you to start on Wednesday morning at noon (after Wednesday's Zoom session).

2.) Once you start the quiz, you must finish it in one sitting. It can not be stopped and restarted.

3.) Allow yourself at least 45-60 minutes to complete the quiz. This should be more than enough time, but if you need more time, you can use it.

4.) You can use your notes and MTM packet as you work through the questions on the quiz.

5.) You can not consult with anyone else about the quiz before, during, or after taking it.

6.) The extended response questions allow you to type your answer directly into the quiz. Some of these questions might require you to show a numerical calculation. Do your best to show your numerical work in a way that I can follow what you are doing, but don't get bogged down with the formatting. Just do your best to communicate what your are doing to solve the problem.

7.) Your access to take the quiz will **end at 3:00 pm on Friday, May 29**<sup>th</sup>, so please do not wait until the last minute to start.

If you have any questions, please contact me or attend the virtual office hour session this week via Zoom. Due to the nature of your assignment this week, I will be available on Zoom on Wednesday only from 10:30 – 11:30 am. A link to access this session will be provided in Monday's email and will also be posted on the class website. Use the time before the quiz is opened on Wednesday to review your work, prepare for the quiz, and to get any questions about the material answered via email or the Zoom session. Answer keys for all of the momentum practice assignments will be posted on the class website for you to study.

## 8<sup>th</sup> Grade STEAM/PJAS

Your Nearpod activity from last week on black holes is due by Friday, May 29<sup>th</sup> by 11:59 pm.

- 1. Use a web browser on a computer or phone and go to join.nearpod.com.
- 2. Enter the code **IYPGF** and then enter your name.

3. Complete the activity, your answers will be recorded and will be counted as part of your 4<sup>th</sup> nine weeks grade.

Also, if you have any assignments that are not finished (have a zero in the gradebook), please finish them by the end of the week.
