Both classes have materials folders set up in the TEAMS feature in Outlook Express. Each week has a folder (Files tab to Class Materials folder) of directions, links and copies of needed documents. Please turn in work via Teams or my email address above.

Both courses end the year with the topic of AGRICULTURE and utilize the same site created by the Department of Agriculture. Each unit topic follows the same format of ONLINE video with Notes questions, Online embedded game and Review Kahoot. Each lesson may/may not contain an additional activity specifically geared to a grade.

Background: Journey 2050 takes students on a **virtual farm simulation that explores world food sustainability**. Using an inquiry based approach the program encourages students to make decisions and adjust them as they see their **impact on society, the environment and the economy at a local and global scale**. The students hear from **farmers across the globe**. As the student interacts with each family they learn the role of best management practices in feeding the world, reducing environmental impacts and in improving social performance through greater access to education, medical care and community infrastructure.

Day	7 th Grade Science: All documents are located in the Teams folder	12 th Grade Enviro Sci All documents are located in the Teams folder
Monday	Water: video with notes	Water: Video with notes
Tuesday	Water: Video with notes	Water: Video with notes
