FOR IMMEDIATE RELEASE

Tenth Street Students Take on PTO STEM Challenges

In honor of the 100th day of school, The Tenth Street PTO provided students from kindergarten to sixth grade with a fun and relative STEM challenge. The challenges ranged from creating a 100 strip paper chain for kindergarten students to building a 100cm tall Spaghetti Tower for the sixth graders. Other Challenges included 100 cup stack, 100 pennies foil boat, and engineering Native American homes and straw rollercoasters. After creating the structures, the students were asked to reflect on their results and write about what they had learned.

Tenth Street students and staff would like to thank the PTO for their donation of materials and instructions for this amazingly fun and great learning experience.
